MAJOR POLLUTANTS

OUTDOOR POLLUTION

5 Major Pollutants

- 1.) Carbon Monoxide (CO)
- 2.) Sulphur Dioxide (SO₂)
- 3.) Nitrogen Dioxide (NO_x)
- 4.) Particulate Matter (PM)
- 5.) Ground Level Ozone

हि० प्र० राज्य प्रदूषण नियंत्रण बोर्ड की - नई पहल

MAJOR POLLUTANTS

INDOOR POLLUTION

5 Major Pollutants

1. Benzene
2. Formaldehyde
3. Trichloroethylene
3. Xylene
4. Ammonia
5. Carbon monoxide

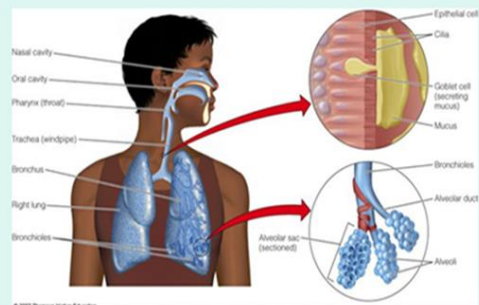

हि० प्र० राज्य प्रदूषण नियंत्रण बोर्ड की - नई पहल

HEALTH EFFECTS OF AIR POLLUTION

• Short Term Effects:

- Stinging, watery eyes
- Scratchy, sore throat
- Cough
- Pneumonia
- Headache

- Cancer, asthma, chronic bronchitis, emphysema

headache

sore throat

respiration problems

stinging eyes

NON-ATTAINMENT TOWNS OF HIMACHAL PRADESH

Hon'ble Chief Minister announced a program namely "PAPA" (Pollution Abating Plants Abhiyan) on 28th March, 2018 with the objective of abatement of air pollution and greening Himalayas.

The PAPA is a vegetative measure through which the State Board has identified 27 species of outdoor plants and 18 species of indoor plants, which would help in control of fugitive emissions and overall improvement in air quality.

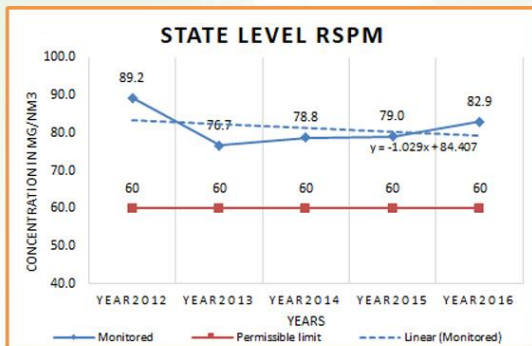

An Initiative of Himachal Pradesh State Pollution Control Board

25	Siris (सिरिस)	<i>Albizia lebeck</i>
26	Spider Plant (स्पाइडर प्लांट)	<i>Chlorophytum comosum</i>
27	Suhanjan (सुहानजन)	<i>Moringa oleifera</i>

हि० प्र० राज्य प्रदूषण नियंत्रण बोर्ड की - नई पहल

Peepal (पीपल)

(*Ficus religiosa*)

Features:

A large tree up to 30 meters (98ft) tall.
Fast growing tree.

Plant Spacing: 20x20 m.

Main features: produces oxygen both during day and night.
Responsible for maximum air purification.

(बरगद) Bargad

(*Ficus Bengalensis*)

Features:

A large tree.
Common plant for the home and office landscape.

Plant spacing: 20x20m.

Eliminates: formaldehyde, xylene and toluene.

Main features:

Long life natural air purifier plant and, helps to fight sick building syndrome. Well known for managing diabetes and the bark also reported to have cholesterol lowering and lipid lowering effects.

(जामुन) Jamun (*Syzygium cumuni*)

Plant care:

Slow growing evergreen tree.
Can reach heights of up to 30m.
Live more than 100 years.

Plant Spacing: 7x7 m.

Main features: Controls diabetes.

Neem (नीम) (*Azadirachta indica*)

Features:

A tall evergreen tree with small bright green leaves.

Plant Spacing: 6x6 m.

Other features:

A single neem leaf can **absorb** around 2.92 grams of **dust** and thus helps in controlling air pollution.

A good insect/pest repellent.

Gives out more oxygen than other trees.

The skin disease can be cured from the neem leaves.

Arjun (अर्जुन)

(*Terminalia bellerica*)

Features:

A medium to large tree (20–25 metres tall).

Plant spacing: 7x7m.

Absorbs: noise pollution.

Other features:

In Theravada Buddhism, Arjun is said to have been used as the **tree** for achieved **enlightenment**, or Bodhi by tenth Lord Buddha called "Anomadassi. Excellent medicinal and ecological properties and well known cardiac tonic. Very good antioxidant for the body.

(बहेड़ा) Bahera

(*Terminalia bellerica*)

Features:

Important herb.

Grows up to 30 meters height.

Plant spacing: 7x7m.

Other features:

Medicinal properties; part of Triphala.

(सिरिस) Siris

(*Albizia lebbbeck*)

Features:

Evergreen.

A medium to big tree.

Grows to a height of 18 - 30 m tall.

Plant spacing: 6x6 m.

Other features:

A road-side tree.

A good soil binder.

Recommended for soil conservation and erosion control.

Regulates hydrological cycle.

Useful for environmental management, forage, medicine and wood.

Muski Kapoor (मुस्की कपूर)

(*Cinnamomum camphora*)

Features:

Commonly known as camphor tree.

A large tree that grows upto 20 to 30m tall.

Plant spacing: 6x6m.

Other features: Smell of camphor when crushed.

An insect repellent and a flea-killing substance.

Mahaneem (महानीम)

(*Melia azedarach*)

Features:

Useful tree for farm and amenity planting, shade, areas subject to drought conditions.

Grows upto 7 - 12 metres tall.

Plant spacing - 6x6m.

Other features:

Used as an insecticide on crops.

(करंज) Karanj

(*Pongamia pinnata*)

Plant care:

Karanj grows to about 15 - 25 meters.

Plant spacing - 6x6m.

Other features:

Used for landscaping purposes as a wind-break.

(बेल) Bael

(*Aegle marmelos*)

Plant care:

Bael - a medium & sub-tropical zone tree.

Plant spacing - 5x5m.

Other features:

The most ancient sacred tree in India.

Mostly planted near temple and used as a dedication to Gods.

The leaves used to worship Lord Shiva.

Kachnar (कचनार)

(*Bauhinia variiegata*)

Plant care:

A small to medium-sized tree growing to 10-12 meters tall.

Deciduous in the dry season.

Plant spacing: 5x5m.

Other features:

Used for curing thyroide related problem.

Amaltas (अमलतास)

(Cassia fistula)

Features:

Medium sized deciduous or semi-deciduous tree.

Ornamental and multi-purpose tree for planting.

Plant spacing: 5x5m.

Other features:

Known as "Aragvadha" in sanskrit which literally means to kill diseases.

Yellow flower.

(अमला) Amla

(Emblica officinalis)

Features:

Medium size deciduous plant.

Grows to a height of 8-18 meters.

Plant spacing: 5x5m.

Other features:

The fruit is an important source of vitamin C, minerals and amino acids.

(सुहानजन) Suhanjan (*Moringa oleifera*)

Features:

Fast growing deciduous tree that can reach a height of 10-12m.

Plant spacing: 5x5m.

Other features:

Support sustainable landcare.

Improves nutrition, boost food security, foster rural development.

Harsingar (हरसिंगार) (*Nyctanthes arbor-tristis*)

Features:

Also known as Night Jasmine or Parijat. Small tree or a shrub growing up to 10 m (33 ft) tall, with flaky grey bark.

Plant spacing: 4x4m.

Absorbs: Noise pollution.

Other features: Floral beauty.

China Rose (चाईना रोज़)

(*Hibiscus rosa sinensis*)

Features:

Perennial evergreen shrub and can grow anywhere from 4 to 15 ft.

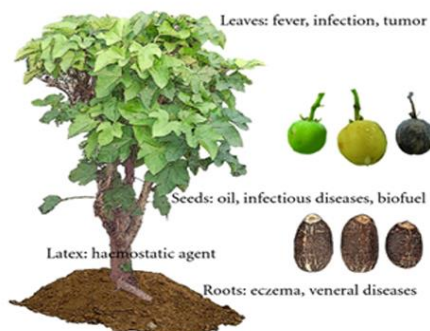

Plant spacing: 3x3m.

Other features: It has a flavonoid known as cyanidin, which has antioxidant as well as anti-inflammatory qualities.

(जटरोफा) Jatropha

(*Jatropha curcas*)

Features:

Bio-diesel and non-edible plant.

Planted in hot and dry land in soil unsuitable for food production.

Ideal option to be grown for phytoremediation in **multi-metal contaminated sites** and to mitigate **soil pollution** for sustainability of land resources.

Plant spacing: 3x3m.

Other features:

Oil reduces emission of carbon monoxide by 44%, sulphate by 100% and ozone forming potential by less than 50%.

Absorption of carbon dioxide.

Combating climate change.

Feed in digesters and gasifiers to produce biogas.

(पीत कनेर)

Pit Kaner

(*Thevetia nerifolia*)

Features:

Evergreen tropical shrub or small tree.

Drought resistant.

Plant spacing: 3x3m.

Absorbs: noise pollution.

Other features:

Medicinal properties.

Yellow/orange yellow trumpet like flower.

Safed Chameli (सफेद चमेली)

(*Jasminum grandiflorum*)

Features:

Evergreen or deciduous shrub.

Plant spacing: 2x2m.

Other features:

Fragrant flowers.

Cultivated in warm for its scented flowers,

An ornamental and as a source of essential oil.

Raat ki Rani (रात की रानी)

(*Cistrum nocturnum*)

Features:

Grown as houseplant.

Aromatic climber shrub.

An evergreen shrub growing up to 3.5 metres tall.

Flowers of Night Blooming Jasmine open in the evening and close the following morning.

Plant spacing: 2x2m.

Other features:

Intense sweet perfume (World's strongest smelling plant) - scent can reach upto 165 ft away from the location of plant.

Best to treat foul smell.

(Lady of the night)

(कपूर तुलसी) Kapoor Tulsi

(*Ocimum kilimandscharicum*)

Features:

King of herbs.

Camphor basil is a perennial plant growing 1 - 2 metres tall.

Aromatic shrub.

Plant spacing: 3x3m.

Other features:

Insect repellent.

Mosquito repellent.

(कड़ी पत्ता) Curry Leaf

(*Murraya koenigii*)

Features:

An aromatic shrubby plant.

A small tree, growing 4-6 m tall.

Tree spacing: 2x2m.

Other feature:

Common occurrence in Himachal Pradesh in areas lying between 800 and 1,450 metres above the sea level.

Has a strong characteristic odour.

Rosemary (रोज़मेरी)

(*Rosmarinus officinalis*)

Features:

A perennial herb with fragrant. Evergreen, needle-like leaves and white, pink, purple, or blue flowers.

Plant spacing: 2x2m.

Other features:

Decorative plants in gardens have pest control effects.

(बसुटी) Basuti

(*Adhatoda Vasica*)

Features:

Also known as Malabar Nut OR Vasa.

A small evergreen plant with sharp, pointed and lance-like leaves.

Plant spacing: 2x2m.

Other features:

Smells like a strong tea.

A well-known medicinal tree.

- One plant for every 100 sq. ft.
- *Toxic to pets
- Remove Benzene, formaldehyde, trichloroethylene, xylene and ammonia released from carpets, glues, area cleaning solutions, synthetic materials such as plastic, fiber and rubber
- Best for Bed rooms (9&16)

हि० प्र० राज्य प्रदूषण नियंत्रण बोर्ड की - नई पहल

Aloe Vera (घृतकुमारी)

(*Aloe barbadensis mill*)

Plant care:

Succulent perennial plant.
Easy to grow and requires a lot of sunlight.

Smart choice for sunny kitchen.

Temperature requirement: 15-27°C.

Toxic: to pets.

Eliminates: benzene and formaldehyde.

Other features:

Used to treat sunburn and minor cuts.

(गोल्डन पोथोस) Golden Pothos

(DEVIL'S IVY) (*Epipremnum pinnatum*)

Plant care:

Extremely easy to grow.

Water when the soil is dry.

Temperature requirement: 13-30°C

Toxic: to pets.

Eliminates: formaldehyde in the air that comes from carpet and other materials in our homes, xylene, toluene, benzene, carbon monoxide.

Other features:

Good plant for living room/housing plant.

A popular house plant well-known for its long, trailing stems that can grow to 8ft or more.

Chinese Evergreen (चाईनीज सदाबहार)

(*Dieffenbachia seguine*)

Plant care:

Water moderately and allow compost to almost dry out before watering.

Like high humidity, a little regular misting. Full shade and good draining; variegated plants need filtered sunlight.

Temperature requirement: 17-27°C

Toxic: to pets.

Eliminates: benzene, carbon monoxide, formaldehyde, trichloroethylene and more. Emits high oxygen content, and purifies indoor air by removing chemicals.

(स्पाइडर प्लांट)

Spider Plant (*Chlorophytum comosum*)

(AIR PLANT)

Plant care:

Easy to grow.

Requires natural light but shouldn't be exposed directly to the sun.

Easy care, elegant growing and popular houseplant.

Water your spider plants two to three times a week.

Temperature requirement: 13-30°C

Non-toxic: Safe for children and animals.

Eliminates: small traces of formaldehyde and carbon monoxide, xylene and toluene, VOCs and most commonly found indoor air pollutants causing asthma, allergies, nasal and eye irritation.

Remove up to 90 percent of the toxins in your indoor air.

Other features:

A commonly found houseplant and one of the best indoor plants (NASA).

Perfect plant for those who have common dust allergies.

(पीस लिली) Peace Lilly (*Spathyphylum*)

Plant care:

Bloom indoors.

A good office plant.

Keep soil slightly moist.

Prefers low-light conditions, medium & indirect.

Temperature requirement: 18-27°C.

Toxic: dogs and cats.

Eliminates: formaldehyde, benzene, common household toxins, even ammonia and certain VOCs that are emitted by harsh cleaning products.

Sucks up acetone, which is emitted by electronics, adhesives, and certain cleaners.

Other features:

An ornamental plant

Gerbera Daisy (जरबेरा डेजी) (*Gerbera jamesonii*)

Plant care:

Likes well-drained soil.

Water approx. once a week.

Temperature requirement: 20-25°C.

Toxicity: None.

Eliminates: benzene, a known cancer-causing chemical, carbon dioxide and **gives off oxygen overnight, which is said to improve your sleep!**

Other feature: Add one to your laundry room or bedroom.

Chrysanthemum (गुलदाउदी)

(*Chrysanthemum indicum*)

Plant care:

Check the soil's moisture every other day and keep it damp.

Loves bright light.

Find a spot near an open window with direct sunlight.

Temperature requirement: 20-28°C.

Toxic to animals: Cats and dogs.

Eliminates: formaldehyde, xylene, ammonia, benzene, commonly found in glue, paint, plastics and detergent.

Other features: Ranks the highest for air purification.

(इंग्लिश आइवी) English Ivy

(*Chrysanthemum indicum*)

Plant care:

Evergreen climbing plant.

Water generously during growth but don't overwater during the winter.

From bright, indirect light to low-light spaces.

Temperature requirement: 18-30°C.

Toxic: dog, cat, horse, goat.

Eliminates: benzene, carbon monoxide, formaldehyde, trichloroethylene, reduces airborne fecal-matter particles.

Other feature: Most durable of all house-plants.

Looks picturesque from a hanging basket or around your windowsill.

(स्नेक प्लांट) Snake plant (*Sansevieria isurentii*)

Plant care:

Does not require bright or sunlight as well as frequent watering.

Temperature requirement: 15-27°C.

Toxicity: Toxic to pets.

Eliminates: benzene, formaldehyde, trichloroethylene, xylene and toluene from the air.

Other features:

Also known as mother-in-law's tongue.

Emits oxygen during the night hence put one in your bedroom.

(Bed room plant)

Rhapis Palm (रेफिस पाम) (*Rhapis excelsa*)

(Lady's palm)

Plant care:

The most well known and widely cultivated species, easily adapting to most interiors.

Grows 8" to 12" in height per year.

Thrives in low light.

Temperature requirement: 16-27°C.

Toxicity: None

Eliminates: toxins and ammonia (found in cleaning products).

Best placed in Bathrooms.

Areca Palm (एरेका पाम)

(*Dypsis lutescens*)

Plant care:

Prefers partial sun and well-drained soil.

This thirsty plant needs plenty of water during growth but less in winter.

Temperature requirement: 18-22°C.

Non-toxic: For both cats and dogs.

Eliminates: benzene, carbon monoxide, formaldehyde, trichloroethylene, xylene and more.

Other feature: a general air purifier.

(रेड-एज्ड ड्रेसेना) Red-edged dracaena

(*Dracaena marginata*)

Plant care:

Gets as high as 15 feet tall, so maybe put it in a room with high ceilings and moderate sunlight.

Popular as easy care houseplant.

Temperature requirement: 15-25°C.

Keep away from direct sunlight.

Require humidity for proper growth.

Toxic for pet animals. keep away from pets.

Eliminates: xylene, trichloroethylene and formaldehyde, which can be introduced to indoor air through lacquers, varnishes and gasoline.

Bamboo Palm (बांस पाम)

(*Chamaedorea seifrizii*)

Plant care:

Keep the soil moist.

Place where air circulates freely and mist occasionally to prevent spider mites.

Likes bright, indirect light and prefers to remain moist but not too much and doesn't like sitting in water.

Easy to grow in shady areas.

Releases a good deal of moisture into the air.

Temperature requirement: 15-28°C.

Toxicity: safe with pets.

Eliminates: benzene, formaldehyde, trichloroethylene, xylene and toluene from the air.

Other features: Act as a *natural humidifier*.

(वीपिंग फिग) Weeping fig (*Ficus benjamina*)

Plant care:

Grown in bright, indirect light.

A popular potted shade plant.

Grows upto 30ft in height.

Temperature requirement: 15-30°C.

Toxic: for pet animals.

Eliminates: pollutants that typically accompany carpeting and furniture such as formaldehyde, benzene and trichloroethylene, toluene.

(ड्रेसेना) Dracaenas

(*Dracaenas*)

Plant care:

The easiest and most common indoor plants around.

Grows inside easily, even without direct sunlight.

Keep its soil moist but not soggy.

Yellow leaves in the plant are sign of over-watering or poor drainage.

Place it near a sheer curtain or a window.

Temperature requirement: 15-30°C.

Toxic for pets.

Eliminates: formaldehyde, xylene, toluene, trichloroethylene. Combats pollutants associated with varnishes and oils with this dracaena.

Rubber plant (रबर प्लांट)

(*Ficus elastica*)

Plant care:

Water moderately to keep the soil moist especially in the winter.

Love bright, filtered light.

An easy plant to care for and can grow well on low light.

Temperature requirement: 15-30°C.

Toxin to animals: Both cats and dogs.

Eliminates: carbon monoxide, formaldehyde, trichloroethylene.

Other features:

Philodendron (फिलोडेन्ड्रन)

(*TPhilodendron bipinnatifidum*)

Plant care:

A popular plant choice.
Prefers moderate water and some sunlight.

Easy to care.

Can last many years.

Toxicity: none.

Eliminates: formaldehyde.

(चाँदनी)

Chandni Air Purifier Hedge

(*Taberhaemotana diaricata*)

Plant care:

Also called as Grape jasmine - an ever-green shrub or small tree growing from 0.5 - 5 metres tall.

Blooms in spring but flowers appear sporadically all year.

The double-flowered form has a pleasing fragrance.

Toxicity: None.
